the Pentagon on 9/11

# Parking Gate Security Camera

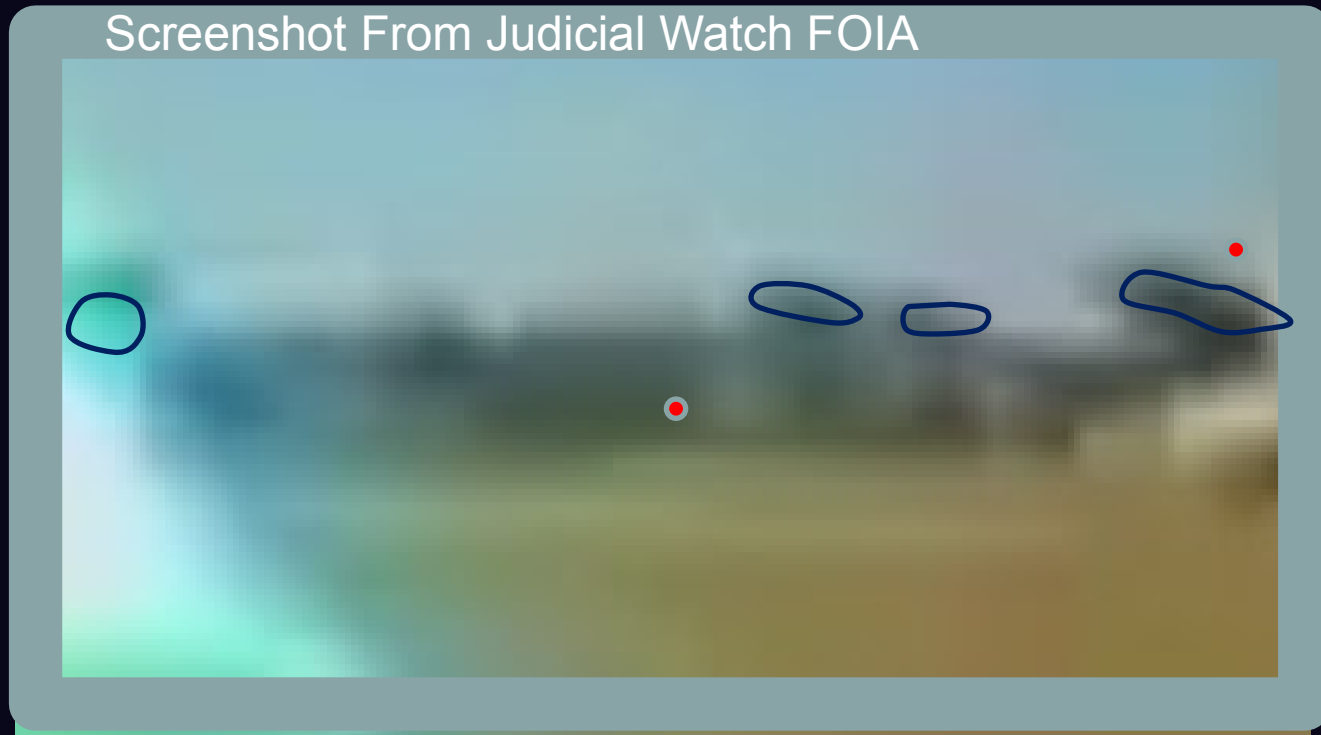

## “Photo shopping” Assertion

- Mazzucco uses reduced quality images in his analysis of the security camera
- When comparing images for “photo-shopping”
  - Original images should be used
  - Not derivative, reduced quality images, that lower the bar on claims that dis-similar images are actually the same image “photo-shopped” in
    - Similar to smearing marshmallow fluff on two different images and then asserting that they are the same.
- Mazzucco must redo analysis with original images
